

Quick and Easy to Use Portable / Mobile Security

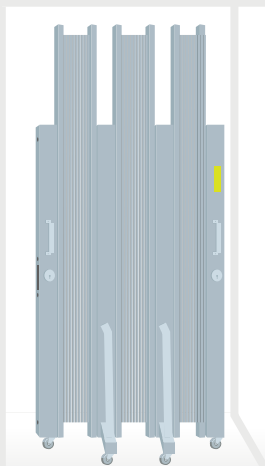

We recognize the importance of easy to use physical security in the fight against crime. Security gates can be quickly and easily deployed in the event of riots, protests or any kind of civil unrest. This makes it significantly more difficult to damage or rob a store. Our mobile gates can be quickly moved and secured into place to help keep you, your property and merchandise secure.

Quantum Security Gates provides you with competitively priced, low maintenance and easy-to-operate products. Security when you need it, and easily stored out of site when you do not.

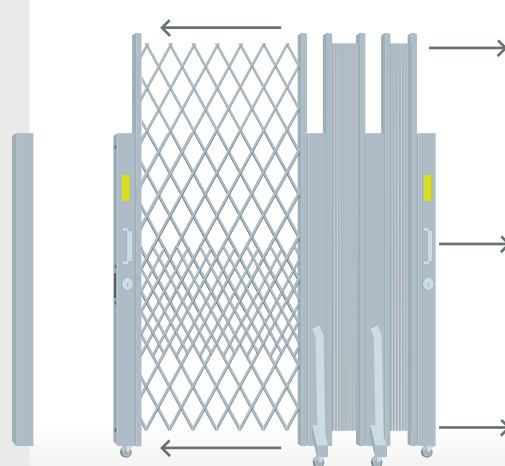

The system is not permanently attached to any storefront fixture. It is conveniently stored neatly out of the way when not in use to ensure that it doesn't detract from the look of the store or deter customers during business hours.

Another great factor is that it can be easily implemented into both new and existing stores. The main bracket is installed to the wall, and then the mobile gate is easily moved and locked in place when needed. The gates can be stored in wall pockets, storage closets, or even off-site to keep the system both hidden and accessible. With the help of heavy duty casters, the gate is able to be moved and expanded easily into place by only one person.

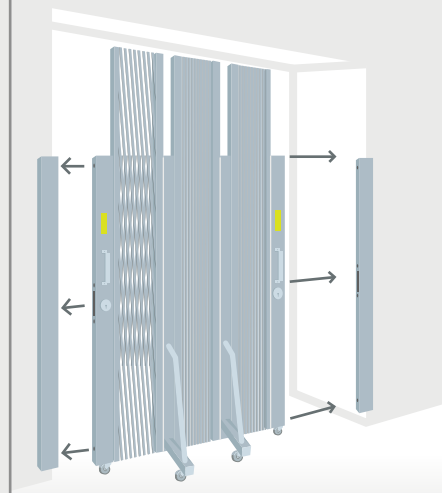

We are proud to offer the only security gate on the market that is both mobile for agility, yet secured and locked in position when you need it.

Out of Sight
